

# DESERT

Trent dj nathan ryan

**ZOOLOGIST**

---

# DESERT ANIMALS

- ✘ Snakes
- ✘ Birds
- ✘ Meerkat
- ✘ Lizards

## SPECIAL ADAPTATIONS

- ✘ They have to live a long period of time with out water and food.
- ✘ They are able to protect there self.
- ✘ Some animals tend to dig holes for shelter

## COMPARING ANIMALS IN MY NEIGHBORHOOD

- ✘ The animals in my neighborhood have lots of vegetation than desert animals.
- ✘ In the desert they don't have as much vegetation.
- ✘ Desert animals are more viscous than animals in my neighborhood.

# ARE THEY IMPORTANT TO US?

- ✘ No, they aren't really important to us.
- ✘ They don't help us with anything
- ✘ They are viscous and don't really care about us
- ✘ All they do is look for prey and protect themselves

**BOTANIST**

---

# BOTANIST

---

- ✘ The desert has cacti and thorny plants
- ✘ They have adapted to desert climate, water shortage, protection against animals, and deep roots for receiving water.
- ✘ The Old Man cactus grows shiny, white hairs to reflect sun.
- ✘ The saguaro cactus has roots as deep as 1 story.
- ✘ Many plants in the desert have grown thorns to protect themselves and to save water.

There is very little rainfall  
Very little vegetation  
It is warm at day cold at night  
They have no seasons

# METEOROLOGIST

---

# METEOROLOGIST

---

- ✘ animals that don't live in desert because little amounts of water same with plants.

# METEOROLOGIST

---

- ✘ There are sand storms and very bright and low visibility and very dry

# METEOROLOGIST

---

- ✘ Here it rains and has good weather and in the desert it is always hot in the day and very little rain and cold at night every night

# GEOLOGIST/SOCIOLOGIST

---

- ✘ . One of the most important biome is how the desert has such little rain fall
- ✘ The weather is very hot and very dry.
- ✘ Plants have to adapted to the weather, because they get such little rain fall.

# COUNTRY'S

- ✘ These country's have deserts in them.
- ✘ Egypt, Libya, Saudi Arabia, Kuwait, Australia, and the U.S.A. have all of the major deserts.

# PEOPLE

---

- ✘ People in the deserts eat snakes, camel meat, and plants that are edible.
- ✘ They travel by camel and make a living by traveling to new places to find water or food.
- ✘ They are different because they don't have a food market they can just go to. They have to find their food, but they don't have to have money to buy the food.

# THREATS

---

- ✘ The oil plants have threats on animal habitats.
- ✘ Off-road vehicles destroy animals habitats.
- ✘ Nuclear waste is dumped in the desert which kills animals from poison.
- ✘ Gold mining is common in the desert which kills animals by poisoning them.
